

QUESTIONS & ANSWERS  
ABOUT FLEA FREE  
FOOD SUPPLEMENT

**Q** How does Flea Free work?

**A** When Flea Free is added to the pets food or drinking water it goes to work internally and emits an enzyme which shields the protein the female needs to lay eggs. Not sensing a protein she will jump off the pet and search for another blood meal because if she doesn't draw blood every 20 to 22 hours she will die. Males never bite.

**Q** How long does it take to work?

**A** Depending on your pets weight, metabolism and infestation, along with the overall health of the animal, it has taken as little as three days or as long as four weeks. The average being 6 to 10 days. White animals take longest.

**Q** Does it really work?

**A** Many swear that Flea Free is the only thing they have found to work on all pets. We don't claim that it works 100% of the time, but it works well enough so that we feel confident to say "either it works or it's free"

**Q** Can you use Flea Free with other vitamins and supplements?

**A** Absolutely. Flea Free can only enhance your pets health and well being. Flea Free is safe and beneficial for all animals.

**Q** Is it safe?

**A** Flea Free is all natural. It is a whole food item that does not contain chemicals, preservatives, artificial colorings or flavorings. It is simply garlic, vinegar, citrus, & herbs essential for good health.

**Do Not Use If Pets Suffer From Anemia**

# FLEA FREE

We are proud to offer you these quality products. We have worked hard to develop them for the safety of you and your pets. We welcome your comments and criticism, because we care about what you think. The responses and results we receive from our customers is truly phenomenal. For the last 25 years we have dedicated our efforts to protecting you and your pets. We offer you the very best in quality, for a more healthy and happy pet. We have used the benefits of vinegar and garlic, along with citrus and selected herbs to develop products containing healthy vitamins, minerals, amino acids, and enzymes to help produce healthier, well groomed, better adjusted and happier pets, that are less vulnerable to germs, insect bites and other parasites.

We love our pets and know you do too, so why not give them the best in a healthy whole food supplement and other natural insect resistant products. Give them the love and care they deserve. They will love you for it.
